## Validation analyses/transformations: 3/3

## Example: Vowels ↔ Syllables

## Example: Vowels ↔ Syllables

Rule: Join vowels to form diphthongs

αιου ↔ αι + ου

δικαίους ↔ δικαί + ους

Rule: Join ambiguous diphthongs on the right—no diaeresis

$\alpha\upsilon\iota \leftrightarrow \alpha + \upsilon\iota$  (not  $\alpha\upsilon + \iota$ )       $\Delta\alpha\upsilon\acute{\iota}\delta \leftrightarrow \Delta\alpha + \upsilon\acute{\iota}\delta$  (not  $\Delta\alpha\upsilon + \acute{\iota}\delta$ )

$\epsilon\upsilon\iota \leftrightarrow \epsilon + \upsilon\iota$  (not  $\epsilon\upsilon + \iota$ )       $\text{Niv}\epsilon\upsilon\tilde{\iota}\tau\alpha\iota \leftrightarrow \text{Niv}\epsilon + \upsilon\tilde{\iota}\tau\alpha\iota$  (not  $\text{Niv}\epsilon\upsilon + \tilde{\iota}\tau\alpha\iota$ )

Rule: Vowels with an iota subscript are a syllable

$\iota\eta \leftrightarrow \iota + \eta$       $\pi\acute{\iota}\eta \leftrightarrow \pi\acute{\iota} + \eta$

$\acute{\iota}\delta\acute{\iota} + \alpha \leftrightarrow \acute{\iota}\delta\acute{\iota} + \alpha$

$\pi\alpha\lambda\alpha + \iota + \tilde{\omega} \leftrightarrow \pi\alpha\lambda\alpha\iota + \tilde{\omega}$

$\epsilon\acute{\iota}\sigma\eta + \epsilon + \iota \leftrightarrow \epsilon\acute{\iota}\sigma\eta + \epsilon\iota$

Rule: Capital vowels with breathing on first vowel are an iota subscript syllable

Ἄι ↔ ἄ

Ἄιδου ↔ ἄ + δου

Ἡι ↔ ἦ

Ἡιόνα ↔ ἦ + όνα

Ἦι ↔ ῥ

Ἦιδείω ↔ ῥ + δείω

Rule: Diaeresis distinguishes syllables

Diaeresis Convention: Use diaeresis to distinguish syllables

ύϊ ↔ ύ + ι      ἰσχύϊ ↔ ἰσχύ + ι

οἰσϋῖνα ↔ οἰσϋ + ινα

ώϊ ↔ ώ + ι      πρῶϊμος ↔ πρῶ + ιμος

Rule: Accent on first vowel of potential diphthong indicates separate syllables

Diaeresis Convention: Accent can distinguish syllables

ύι ↔ ύ + ι      ἰσχύι ↔ ἰσχύ + ι

οἰσύινα ↔ οἰσύ + ινα

ώι ↔ ώ + ι      πρῶιμος ↔ πρῶ + ιμος

Rule: Breathing on first vowel of potential diphthong indicates separate syllables

Diaeresis Convention: Breathing and/or accent can distinguish syllables

αῖ ↔ ᾱ + ῑ

αῖδιον ↔ ᾱ + ῑδιον

ἐϋ ↔ ἑ + υ

ἐϋξέστου ↔ ἑ + υξέστου

οῖ ↔ οῖ + ι

οῖκὸν ↔ οῖ + ικὸν

εὐι ↔ εὐ + ι

εὐιπποτάτην ↔ εὐιπποτάτην

Rule: Diaeresis goes in middle of three syllables

ουϊά ↔ ου + ι + ά

Ἀλληλουϊά ↔ Ἀλληλου + ι + ά

Rule: Vowels that don't form a diphthong don't need a diaeresis

Diaeresis Convention: Omit unnecessary diaereses

$\eta\grave{\imath} \leftrightarrow \eta + \grave{\imath}$

$v\eta\grave{\imath} \leftrightarrow v\eta + \grave{\imath}$

$i\grave{\imath} \leftrightarrow i + \grave{\imath}$

$\Delta i\grave{\imath} \leftrightarrow \Delta i + \grave{\imath}$

Rule: Use a diaeresis on a second iota or upsilon

Diaeresis Convention: Use diaeresis on all iota/upsilon vowel pairs

$\omega\ddot{u} \leftrightarrow \omega + u$

$M\omega\ddot{u}\sigma\tilde{\eta}\varsigma \leftrightarrow M\omega + u\sigma\tilde{\eta}\varsigma$

$i\ddot{u} \leftrightarrow i + u$

$\delta i\ddot{u}\lambda\acute{\iota}\zeta\omicron\nu\tau\epsilon\varsigma \leftrightarrow \delta i + u\lambda\acute{\iota}\zeta\omicron\nu\tau\epsilon\varsigma$

$i\ddot{i} \leftrightarrow i + i$

$\delta i\ddot{i}\sigma\chi\upsilon\rho\acute{\iota}\zeta\epsilon\tau\omicron \leftrightarrow \delta i + i\sigma\chi\upsilon\rho\acute{\iota}\zeta\epsilon\tau\omicron$

$o\acute{i}\acute{\alpha} \leftrightarrow o i + \acute{\iota} + \alpha$

$\epsilon\acute{u}\pi o\acute{i}\acute{\alpha}\varsigma \leftrightarrow \epsilon\acute{u}\pi o i + \acute{\iota} + \alpha\varsigma$

# Script Stages: Elision, Punctuation

# Script Stages: Vowel, Consonant

# Script Stages: Syllable

# Script Stages: Breathing

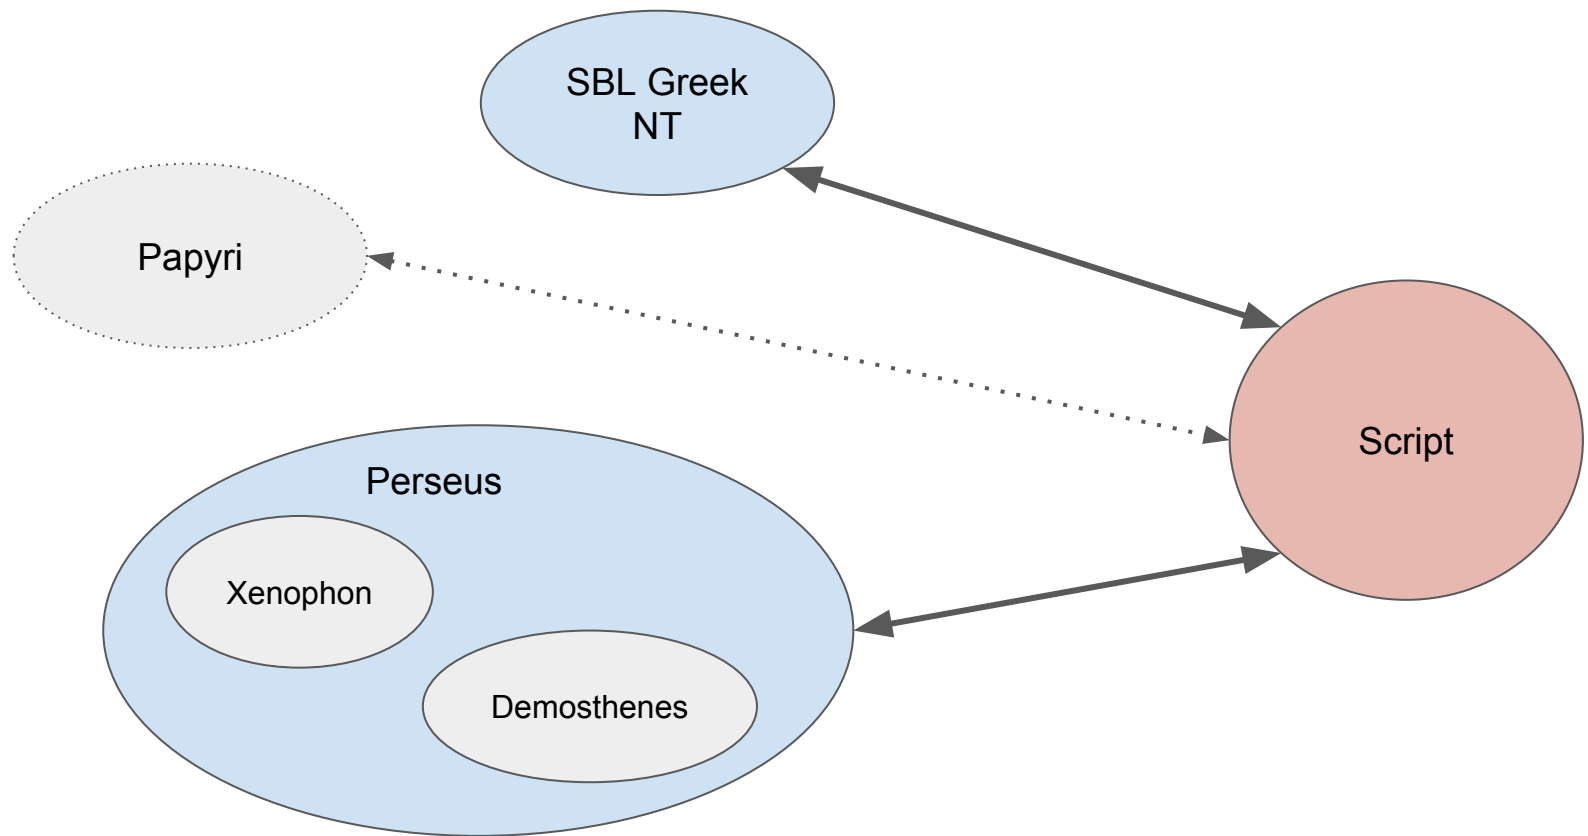

# Script Stages: Accent

# Script: Summary of Word Properties

1. Initial Aspiration: yes / no
2. Syllables, each of which consist of:
  - a. Initial consonants
  - b. Single vowel, diphthong, or improper diphthong
3. Final Consonants
4. Optional Accent with properties:
  - a. Acute or circumflex
  - b. Position: Ultima, penult, or antepenult
  - c. Force acute: yes / no
  - d. Extra accent: yes / no
5. Diaeresis convention
  - a. Accent/breathing distinguishes syllables: yes / no
  - b. Always use diaeresis with i,u: yes / no
6. Crasis: yes with position / no
7. Elision: yes / no
8. Unmarked: yes / no
9. Capitalized: yes / no
10. Has punctuation: yes / no

# Script: Primary Sources

# Error Correction

## SBL Greek NT

- Fixed 12 grave accents with punctuation
  - e.g. αὐτόν. → αὐτόν.
- Fixed 4 double accent errors
  - e.g. θέλοντές. → θέλοντες.

# Error Correction

## SBL Greek NT

- Fixed 12 grave accents with punctuation
- Fixed 4 double accent errors

## Perseus

- Fixed 1 grave accent error.
  - δέ, → δέ,
- Final sigmas
  - †δραχμή†      Λακεδαιμονίους
- Parentheses errors from beta code errors
  - e.g. εἶχε δὲ καλόν' → (εἶχε δὲ καλόν)
- XML errors
  - e.t. ltàngt → &lt;àn&gt; → <àn>
- Paragraph error—no Greek text
- 10+ pull requests, ~50 corrections

# Model/Rule Correction

Rule: Use **ς** for  $\sigma$  at the end of a word (final sigma)

# Model/Rule Correction

**Rule: Use ς for σ at the end of a word (final sigma)**

But... καὶ ὅς' εἰς ἡμᾶς ἐβλασφήμησαν

# Model/Rule Correction

**Rule: Use ζ for σ at the end of a word (final sigma)**

But... καὶ ὅς' εἰς ἡμᾶς ἐβλασφήμησαν

**Rule: Circumflex cannot go on the antepenult**

# Model/Rule Correction

**Rule: Use ζ for σ at the end of a word (final sigma)**

But... καὶ ὅς' εἰς ἡμᾶς ἐβλασφήμησαν

**Rule: Circumflex cannot go on the antepenult**

But... ὦτινι, οἶάπερ

(cf. Smyth 186)

# Model/Rule Correction

**Rule: Use ζ for σ at the end of a word (final sigma)**

But... καὶ ὅς' εἰς ἡμᾶς ἐβλασφήμησαν

**Rule: Circumflex cannot go on the antepenult**

But... ὦτινι, οἶάπερ

(cf. Smyth 186)

**Rule: Crasis only occurs on first syllable (e.g. κάγω)**

# Model/Rule Correction

**Rule: Use ζ for σ at the end of a word (final sigma)**

But... καὶ ὅς' εἰς ἡμᾶς ἐβλασφήμησαν

**Rule: Circumflex cannot go on the antepenult**

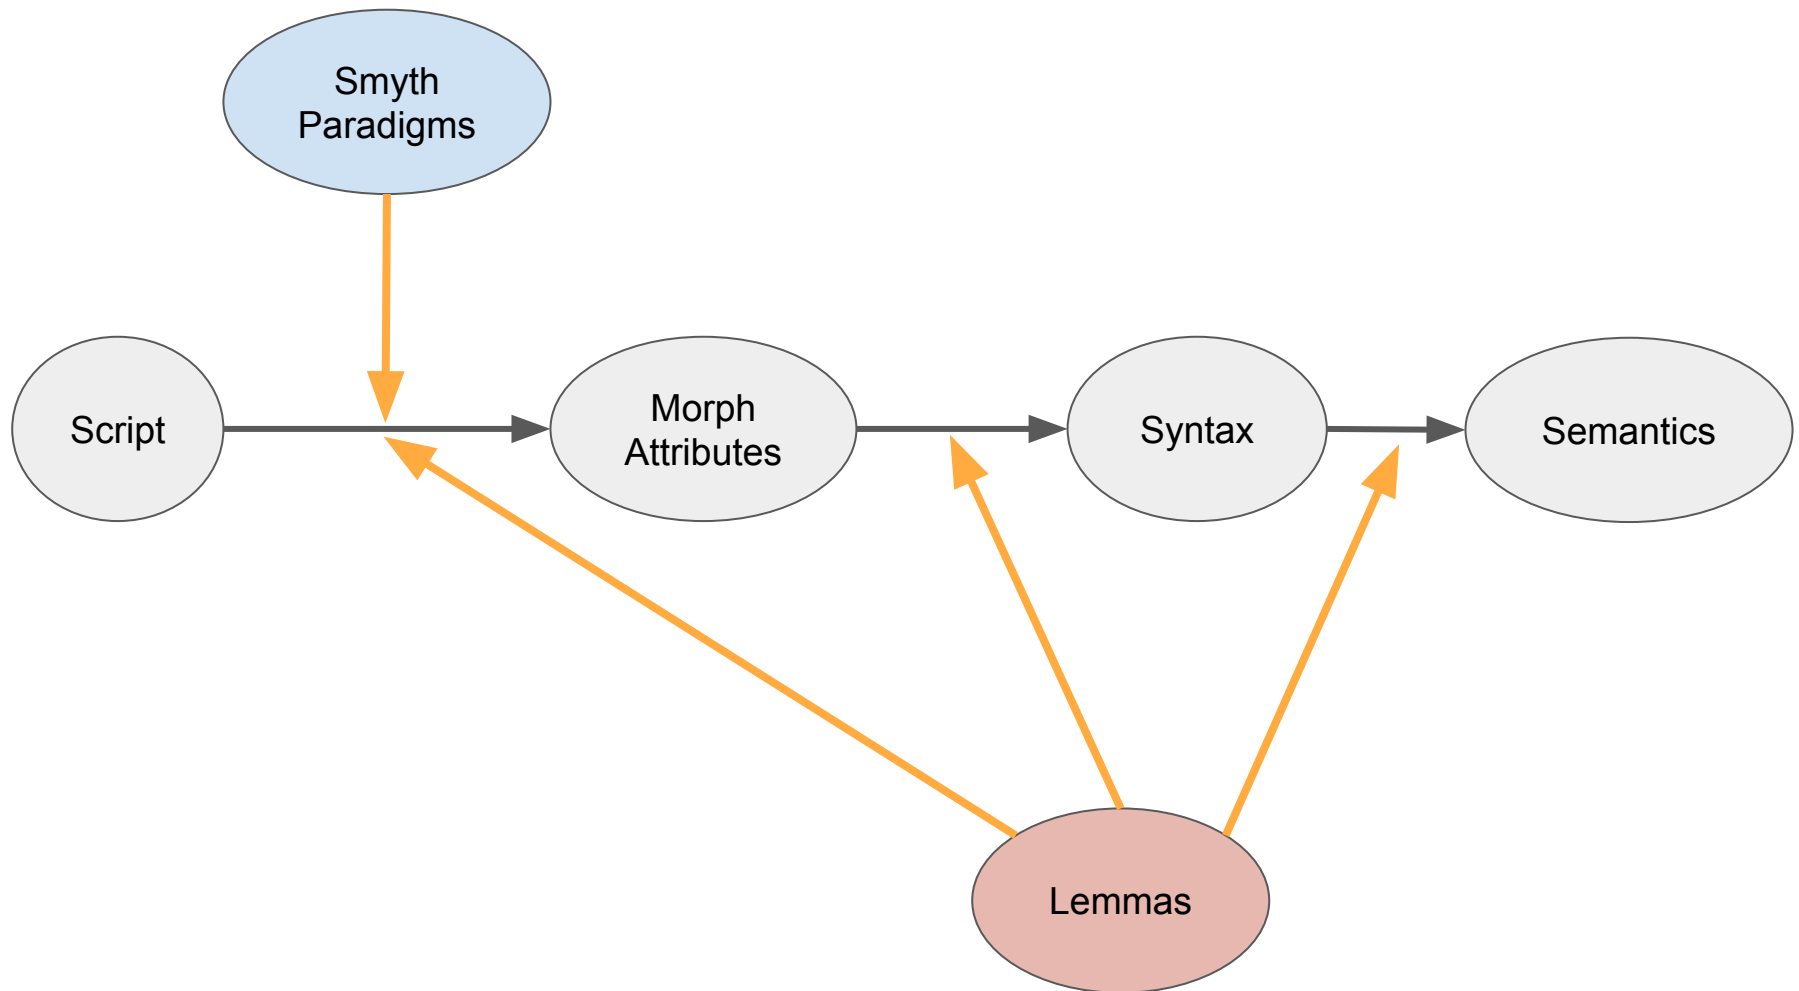

But... ὦτινι, οἶάπερ

(cf. Smyth 186)

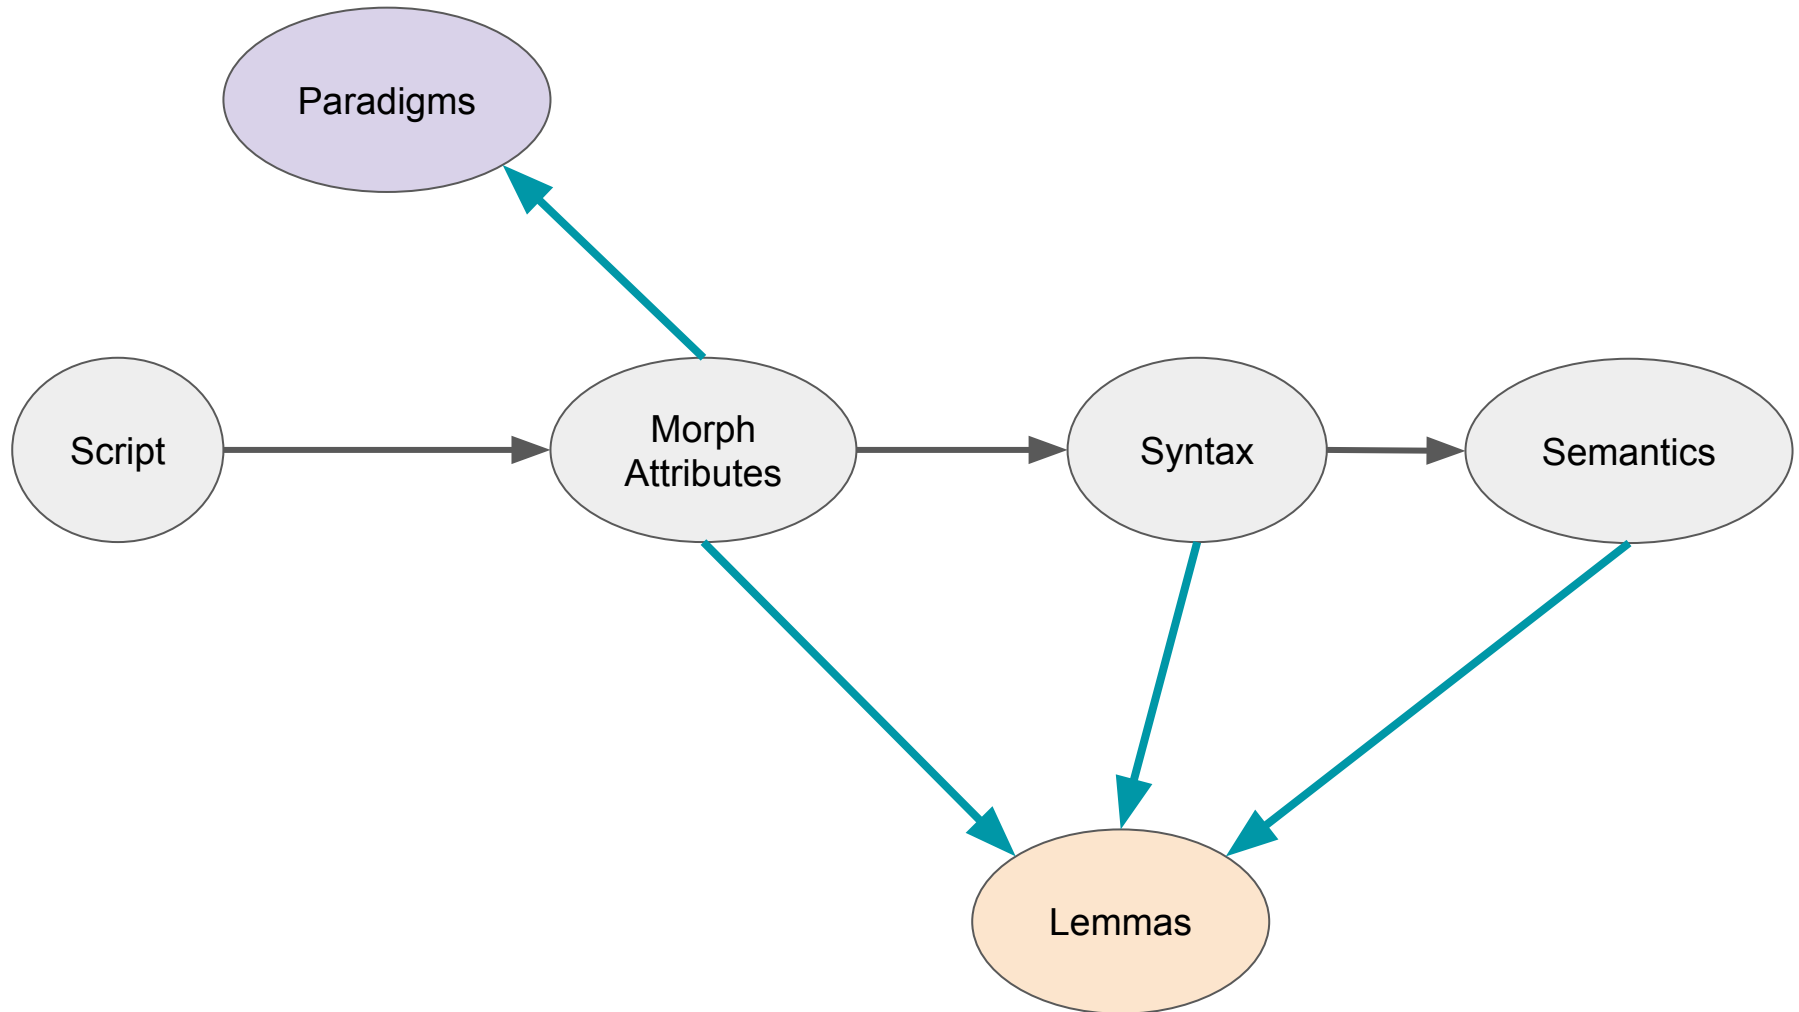

**Rule: Crasis only occurs on first syllable (e.g. κάγω)**

But... καλοκάγαθία, ἐγώμαι, μεντᾶν

# Paradigm Analysis

# Paradigm Analysis

# Example: Word Formation

## PART III

### FORMATION OF WORDS

#### 839. AGENCY

**a.** The primary suffixes *τᾱ*, *τηρ*, *τορ*, *τρο*, *ευ*, denoting the agent or doer of an action, are masculine.

1. **τᾱ** (nom. -τή-ς): *κρι-τή-ς* judge (*κρίνω* decide, *κρι-*), *κλέπ-τη-ς* thief (*κλέπ-τ-ω* steal), *ποιη-τή-ς* poet, i.e. maker (*ποιέ-ω* make), *αὐλη-τή-ς* flute-player (*αὐλέ-ω* play the flute), *μαθ-η-τή-ς* pupil (*μανθάνω* learn, *μαθ-ε-*), *ἰκ-έ-τη-ς* suppliant (*ἰκ-νέ-ομαι* come, *ἰκ-*).
2. **τηρ** (nom. -τήρ): *δο-τήρ* giver (*δί-δω-μι* give, *δο-*, *δω-*), *σω-τήρ* saviour (*σώ-ζω* save).
3. **τορ** (nom. -τωρ): *ρή-τωρ* orator (*ἐρέω* shall say, *ἐρ-*, *ῥε-*), *εἴ-ρη-κα* have spoken, *κτίσ-τωρ* founder (*κτίζω* found, *κτιδ-*), *σημάντωρ* commander, poet. (*σημαίνω* give a signal, *σημαν-*).
4. **τρο** (nom. -τρό-ς): *ἰᾱ-τρό-ς* physician (*ἰα-ομαι* heal).
5. **ευ** (nom. -εύ-ς): *γραφ-εύ-ς* writer (*γράφ-ω* write), *τοκ-εύ-ς* father (*τίκτω* beget, *τεκ-*).

**b.** The primary suffixes *τριδ*, *τριαῖ*, *τειραῖ*, *τιδ* are feminine.

1. **τριδ** (nom. -τρίς): *αὐλη-τρίς* female flute-player.
2. **τριαῖ** (nom. -τρια): *ποίη-τρια* poetess (late), *ψάλ-τρια* female harper (*ψάλλω* play the harp, *ψαλ-*).
3. **τειραῖ** (nom. -τειρα from *τερ-ια*): *σώ-τειρα* fem. of *σω-τήρ*, *δό-τειρα* fem. of *δο-τήρ*.
4. **τιδ** (nom. -τις): *ἰκ-έ-τις* female suppliant fem. of *ἰκ-έ-της*.
